

# Common kissing mistakes

*by shiva*

## **1. Bad breath**

It kills the mood! Unsure of how fresh you smell? Pop a mint or mouth freshener. If you're eating heavily seasoned food (example: garlic) then it's a good idea to have her taste it too, so that your tastes blend.

## **2. Moving too aggressively, too intimately, too fast**

Some men think they have to show the woman how passionately he wants her. And how does he show it? By shoving his entire tongue into her mouth, right at the start. Don't do it. It's a sign of sexual ignorance. Start gently, wait for her to invite you in.

## **3. The woodpecker kiss**

A stiff, pointy tongue darting in and out of her mouth can feel weird!

## **4. Slobber**

Make sure your mouth is not overly wet; it's a turn-off.

## **5. Scheming the next move**

Women can tell when a man is kissing only because he wants to move to the next step (of touching breasts or genitals) and not because he is enjoying the kiss itself. Enjoy the moment. Kiss her as if there is nothing else you expect, as if this is all you want. And guess what, it actually increases your chances of moving to the “next step”.
